

The levels of the universe (an upgradable sketch) to the unredeemed spirit.

Spiritual levels (supporting and leading levels)	Subtle levels (intermediate levels, link)	gross material level
Realities of highest <b>reality</b> degree and of lowest <b>relativity</b> degree	Intermediate levels in terms of <b>reality</b> and of <b>relativity</b>	Reality of lowest <b>reality</b> degree and of highest <b>relativity</b> degree
Spirit = cause	Subtle realm = action principle	Body = manifestation/effect
Higher-dimensional hyperspaces; > 5 dimensions (space-time-spirit dimensions) Space and time are means for the spirit and freely interchangeable and yet fictitious	≥ (?) 5-dimensional space-time  Time and space interchangeable (?) and in the weak coupling (?)	4-dimensional space-time  Limitations of the physical phenomena give the impression that time and space are coupled to each other
Higher dimensional hyper-worlds (non-physical worlds)	Sections of the higher- dimensional hyper-worlds, imaginary worlds (non-physical worlds)	Section of 5- and higher-dimensional worlds, physical world
<b>Spiritual quantities:</b> Spiritual energy (Psi energy, Reiki, thoughtless forces, visions,...)	<b>Imaginary quantities (non- physical):</b> Energy (orgone, prana, aura, Kundalini, Chakras as transmitting and receiving stations, ether, tachyons, ...)	<b>Physical quantities:</b> Energy (atomic and subatomic energy particles, light, radiation, electricity, ...)
<b>Fields</b> (indistinguishable from spiritual energy, thought fields)  <b>No mass</b> (pure energy)	<b>Fields</b> (morphic fields, Akashic records, ...)  <b>Imaginary mass</b> (elementals = thought forms, tachyons, ...)	<b>Fields</b> (Gravitational fields, electromag- netic fields, weak and strong nuclear fields)  <b>mass</b> (particles of matter)
Causative levels (functional mirroring of Heaven)	Levels of the active principle	Level of effects and manifestations, based on the spiritual processes
<b>Spiritual laws:</b> Thoughts can create all sorts of things and impossible things	<b>Subtle laws</b> , law of transformation and change	<b>Material laws</b> , laws of conversion, equivalence of mass and energy, equivalence of inertial and gravitational mass, relations to curvature of space- time, ...
Dialogue, conflict, internal disunity, doubt, ...  → Uncertainty in application of spiritual laws	<b>Law of polarity (Yin-Yang principle):</b> cyclical processes of the cosmos, elementary processes, karmic cycles, sleep-wake rhythm, day-night cycle, ...  Law of Polarity = testimony of "law-violation" (incorrect application) that is based on an uncertainty, which brings the spirit to the cyclical waver (vicious spirals): the cyclical processes are the manifestations of these "think-spirals"	
Travels freely available in space- time; intake of bird's eye views (Overview to time events of Matter specific space-time)	Travels in the space-time possible without any special conversion processes (on mental/spiritual ways)	Travel of the body in space-time only (?) possible by conversion into subtle intermediate states (beaming); Time travel of the spirit for example possible in Trance / hypnosis without dematerializa- tion of the body
